SUSTAINABLE DEVELOPMENT OF THE NATIONAL ECONOMY: FACTORS AND PROSPECTS

Abdulaziz A. ABDUVALIYEV

PhD of Economics, Chief of sector "Research center "Scientific bases and issues of development of Uzbekistan economy" under the Tashkent state university of economics"

Summary. As shows world experience, from year to year the factors influencing the level of stability of national economy of any country increase more and more. Therefore, to be to possible calls, ready to all, quickly to develop and apply necessary measures during the crisis period and to protect national economy, is one of the priority directions of ensuring stability of national economy. But to develop necessary strategy of ensuring stability of national economy it is necessary to analyses deeply operating

economic mechanisms, strong or weak positions of national economy.

Therefore, the author in this article opens a tendency of development of the industry, increase in a share of small and private business in GDP, anti-recessionary measures of the government during the world financial and economic crisis on protection and stimulation of national economy, a tendency of development of investment and a problem of implementation of the investment program of economy of Uzbekistan.

Key words: *national economy, industry, small business, export, import, free economic zone, modernization program.*

From year per annum more increase the factors, influencing upon level of stability of the national economy of favor of one particular country. Consequently, get ready on all possible call, operative to develop and use the necessary measures at crisis period, is one of the priority directions of the provision to stability of the national economy. But to develop the corresponding to measures, is required deep analysis acting economic mechanism and that more it is important, weak and strong positions of the economy.

Consequently, author in given article reveals the trend of the development to industry, increase the share of the small business and quotient enterprise in GDP, crisis management of the measure government at period world financial-economic crisis on protection and stimulation of the national economy, trend of the development to investments and problems of the realization of the investment program of the economy Uzbekistan.

The Certificate of the progressive change the structure of our economy is all increasing in her role of the small business and quotient enterprise. As a result taken measures on stimulation of the development of the small business and quotient enterprise in 2014 is created over 20 thousand new subject small business that in 2 times more in contrast with 2000.

The realization of the programs to moderniza-

tions, technical and technological renovation production, as well as measures on increasing of financial stability industrial enterprise promoted further deepening the processes of the structured transformations and diversifications of the branches to industry. So, leading locomotive becomes from year per annum machine-building industry of our economy. If as a whole in rate of growth of the volume industrial production on branch of machine building and metalworking is tracked positive track record of the development, however, consider that follows to accent attention on weakening positions in given to branches such as civil-road machine building, tractor and agricultural machine building and others

Importance of the accent of attention on machine-building branch is concluded in that that, according to experience of the development of the world economic system, exactly such branches as machine-building industry, chemical industry, information-communication technologies and energy industry are a locomotive in turning the economy on innovation way of the development.

Consequently, considering urgency of the summons, phased turning the national economy on *ИННОВАЦИОННЫЙ* way of the development particularly important is support state such important branches of the national economy, as machine-build-

ing, chemist-technological, production and sphere of the services in information-communication technol-

ogy, which will play the key role in formation and development innovation-oriented economy.
