INSTITUTIONAL PROVIDING OF EVALUATION OF EFFICIENCY OF REGIONAL STRATEGIES OF DEVELOPMENT

Iryna V. TIAZH KOROB

Ph.D. in Economics, Associate Professor, Department of Finances and Financial-Economic Safety, Lviv Institute of Banking of State Higher Educational Institution «University of Banking»

Summary. The results of comparative analysis of the institutional providing of evaluation of efficiency of strategies of development of regions are driven in Canada, countries of EC and Ukraine. It is marked

that upgrading of strategies of development of home regions bringing in will assist to the process of their evaluation of not only government bodies but also public.

Key words: *region, development, strategy, monitoring, evaluation, institutional providing.*

It is well-proven in the article, that quality of strategies of development of regions depends on the presence of the competitive institutional providing of evaluation of their efficiency. Under the institutional providing of strategic management development of regions it is suggested to examine totality of state and non-state institutes. They create legal, organizational and economic terms necessary for effective realization of strategies of development of regions. Certainly, that the basic constituent of the institutional providing is a normatively-legal (presence of the government programs of development of region (of territory)). She will determine an organizational structure, accountable for implementation of the certain stage of strategic management of development of region (of territory); task; skilled resources that will be involved in this process (own or external); methods (are approaches) and criteria that will be used for an analysis and estimation.

The comparative analysis of the institutional providing of evaluation of efficiency of strategies of de-

velopment of regions is conducted in Canada, countries of European Union and Ukraine. He showed that in a home legislation attention not enough is spared monitoring and evaluation of efficiency of realization of strategies of development of regions. A necessity is an improvement of not only normatively-legal base but also organizational approach of evaluation of realization of strategies of development of region. In this connection the use of foreign experience of «management is offered on results». This approach envisages participation of parties concerned; determination of the expected results; determination of responsibility and risks; choice of indexes of effectiveness and effective activity; a capture of data is about effectiveness and efficiency of activity and stowage of report on realization of estimation. It is thus marked that bringing in is to the process of evaluation of strategies of development of not only government bodies but also public will provide objectivity and authenticity of results of estimation.
