«The scientific basis and development issues

Uzbekistan's economy «in the

Tashkent State Economic University

Summary: *Issued the actuality of the development government corporations in the world economy, analyzed the role and the tendency of development government corporations in the country with*

transition economy, learned the process of reforming government enterprises in China and analyzed the tendency of development the corporate management in Uzbekistan.

Key words: *government, corporation, government corporations, innovation, development, national economy, crisis, TNC.*

In the world practice the government corporations are characterized with financial-economic, scientific-technical and innovation potential. Developments in the last several years, in developed and developing countries are raising high interest. Because, global financial-economic crisis of 2008-2009 forced a lot of developing countries pay attention to the participation of government in forming the corporate structures.

It is an important mark, that government TNC positively influences the macroeconomic indicators, such as employments they locate. In this article such countries as France, Germany, China and Italy are analyzed. Noted the very important role of government enterprises in the economies of developing countries such as China, Brazil, India and Russia.

Detailed issues about the processes reforming government enterprises in Chinese economy, with conditional divided on 3 stages: 1 stage – broadening the laws the government enterprises on self-government. 2 stage – the reforms of government

sectors of economy. 3 stage – improvement management system on government enterprises.

An article also analyses the experience of establishing and developing government enterprises in Russian economy. For that important role played government policy oriented to establish the government corporation in strategic sectors, such as oil-energetic complex.

The analysis of developing government corporations in the countries with developing economies may conclude that the government corporation establishes the base for developing new mechanism of developing national economy and developing on innovation base that handles branches of industry etc.

The article grasps the tendency of developing the corporate sector of Uzbekistan's economy. In particular analyzes the reforms in corporate system of the joint-stock companies stressing the regulatory enactment of developing the corporate management in the join-stock enterprises of Uzbekistan.
